

CARLOS ALEJANDRO CORONADO OBREGON

Solutions Architect

ABOUT ME

Full-Stack Software Engineer | IT Consultant.

Specialist in SaaS Architecture and end-to-end product development. Advanced proficiency in Node.js, React, and graphics engines for immersive simulations.

Expert in building scalable systems, performance optimization, and technical leadership. Committed to engineering high-quality, functional applications that solve complex enterprise challenges.

EDUCATION

Bachelor of Video game design and development

Universidad Cuauhtémoc de San Luis Potosí
2022 - 2026

Supplementary studies in information technology engineering

Universidad Politécnica de San Luis Potosí
2017 - 2022

SKILLS

C# .NET

Unity

Java Script

PHP

AI Coding

Leadership

LANGUAGE

- English B2
- Español nativo

EXPERIENCE

Project Director & Sales Manager

2024 - Present

gamespiration I SLP, SLP, Mexico

- Pre-Sales Solutions Architecture: I led the technical design and feasibility assessment of bespoke software projects for the corporate sector, ensuring the successful closure of strategic contracts through proposals that balanced technical innovation with business profitability.
- Requirements Engineering (Bridge-to-Tech): I acted as the critical technical liaison between corporate clients and the engineering team, translating abstract business needs into granular technical specifications and scalable architectures, thereby eliminating feasibility risks from the conception phase onwards.
- Technical Project Stewardship: I ensured the successful delivery of original software products from start to finish, maintaining rigorous control over technical quality standards and execution KPIs, and delivering robust solutions that exceeded end-customer expectations.

XR Developer

2022 - 2024

Fyware I SLP, SLP, Mexico

- VR & Immersive Technology: Engineered VR industrial training simulators that directly improved operational safety metrics for enterprise clients through immersive simulations.
- High-Performance Development: Architected high-performance interactive experiences using C# and Unity for large-scale marketing and educational platforms.
- Technical Problem Solving: Developed a proprietary 3D format conversion system leveraging reverse engineering to optimize asset interoperability.
- AR Solutions: Deployed Augmented Reality (AR) experiences for corporate marketing campaigns, streamlining brand engagement through Snapchat's developer framework.
