

# CARLOS ALEJANDRO CORONADO OBREGON

Full Stack & AI Architect | Technical  
Game Developer | XR Developer

## ABOUT ME

Specialist in high-performance  
Unity development, system  
optimisation and the development  
of proprietary tools.

## EDUCATION

**Bachelor of Video Game Design and  
Development**

Universidad Cuauhtémoc de  
San Luis Potosí  
2022 - 2026

**Supplementary studies in Information  
Technology Engineering**

Universidad Politécnica de San  
Luis Potosí  
2017 - 2022

## SKILLS

C# .NET

Unity

Node.js

Laravel / PHP

Unreal

C++

Python

React / Vue

APIs

AI Agents

## LANGUAGE

- English fluent
- Español nativo

+52 444-130-4280

Madre Selva 172,  
Tecnologico, SLP, SLP, Mexico

## EXPERIENCE

**AI Agent Dev & FullStack** 2026 - Present

AIA (Startup) | SLP, SLP, Mexico

- AI Agent Development & System Integration: Designed and deployed custom intelligent AI agents across multiple industries, seamlessly integrating them into enterprise ecosystems (CRMs, ERPs, and web platforms) to automate sales, streamline operations, and accelerate research workflows.
- API Architecture & Backend Engineering: Built and orchestrated robust, scalable proprietary APIs leveraging modern languages including JavaScript (Node.js) and C#, ensuring seamless data flow and interoperability between disparate business systems.
- LLM Orchestration & Implementation: Advanced integration of cutting-edge Large Language Models (including Gemini, Claude, GPT, and DeepSeek) to serve as the core cognitive engine for specialized, task-oriented AI agents.
- Full-Stack Development & Platform Architecture: Engineered end-to-end architecture for proprietary platforms, including custom CRMs and AI-powered chat interfaces, utilizing both relational and non-relational database management systems (SQL/NoSQL).

**Project & Dev Director** 2024 - Present

gamespiration | SLP, SLP, Mexico

- Product Leadership: I lead the technical architecture of bespoke projects for the corporate sector, ensuring a balance between technical innovation and cost-effectiveness.
- Engineering Management: I act as a technical bridge, translating complex business requirements into highly precise technical specifications for the development team.

**XR Developer** 2022 - 2024

Fyware | SLP, SLP, Mexico

- VR in Industrial Medicine: I developed Virtual Reality training simulators that had a direct impact on operational safety for clients in the medical sector.
- Tool Innovation: I laid the foundations for a proprietary 3D format conversion system using reverse engineering, optimising workflow and asset interoperability.
- High Performance: I designed large-scale interactive experiences using Unity and C#, focusing on resource optimisation for educational platforms.
- Immersive Marketing: I implemented Augmented Reality (AR) experiences for global corporate campaigns.

## TECHNICAL ACHIEVEMENTS AND AWARDS

- Semi-finalist - Game Jam Plus Brazil (2025): International recognition in competitive video game development.
- Semi-finalist - BBVA Hackathon (2022): Development of an LLM model.
- 1st Place (Local) - NASA Space Apps Challenge (2022): Development of a technological solution recognised for its innovation.
