PROFILE

An **AI Solutions Architect & Lead Software Engineer** specialized in designing enterprise-grade multi-agent systems, automated workflows, and scalable cloud platforms. Proven track record of **reducing operational processing times by up to 60%** and **optimizing system performance by 40%** by translating complex business bottlenecks into high-value AI architectures. Expertise in LLM orchestration, full-stack microservices (Python, Node.js, React), and high-performance interactive/3D technologies (Unity, C#).

SKILLS

AI & Solutions Architecture

- Multi-Agent Systems
- Agentic Workflows
- LLM Orchestration & APIs
- Enterprise Automation
- Cloud ERP Design

Methodologies & Tools

- Agile (Scrum, Kanban, Waterfall)
- System Architecture & Design
- Technical Documentation & SRS
- Git, GitHub, CI/CD
- UAT & Quality Assurance

Technical Stack

- Python, Node.js, C#
- React.js Inertia.js
- RESTful APIs, Microservices
- SQL (PostgreSQL, MySQL)
- Unity 3D, Blender, Meshroom

Education & Highlights

- B.S. Valedictorian (GPA 9.4/10)
- Advanced XR & 3D Pipelines
- Enterprise Software Engineering
- Cross-Functional Leadership
- Bilingual (Spanish / English)

PROFESSIONAL EXPERIENCE

Lead AI Solutions Architect

AIA (AI Automation Agency)

- Automated complex corporate workflows and reduced manual processing time by up to 60%** by architecting and deploying custom multi-agent AI systems built on Python, Node.js, and modern LLMs.
- Eliminated data silos and enabled real-time decision-making** by orchestrating secure, scalable API integrations between LLM engines and legacy enterprise backends/databases.
- Accelerated client AI adoption timelines by 40%** through structured technical discovery sessions, translating executive business needs into clear architectural roadmaps and ROI-driven automation specs.

05/2026 – Present
San Luis Potosi,
Mexico

Lead Full-Stack Architect & Developer

DishQ

- Centralized real-time inventory and sales tracking across multi-location operations** by architecting a high-performance cloud ERP platform using React, Node.js, and SQL.
- Reduced cross-branch data synchronization latency by 45%** and eliminated stock discrepancy errors by engineering lightweight backend microservices and real-time messaging protocols.
- Cut weekly administrative reporting effort by 30%+ for management** by designing automated inventory analytics modules and intuitive executive dashboards.

05/2024 – 01/2025
San Luis Potosi,
Mexico

Software & XR Developer

Fyware

- Enhanced workforce training safety compliance and engagement** by developing interactive VR training simulators and AR marketing applications in C# and Unity 3D.
- Optimized rendering performance by 40% while maintaining a stable 60+ FPS on target hardware** through advanced 3D asset pipelines, photogrammetry with Meshroom, and retopology in Blender.
- Decreased post-deployment critical bugs by 35%** by establishing rigorous QA testing protocols and real-time performance profiling for interactive builds.

08/2022 – 08/2024
San Luis Potosi,
Mexico

PROJECTS

LPAV

Travel Platform SPA

- Improved initial page load speeds by 40% and boosted user retention** by building a responsive Single Page Application (SPA) in React and Tailwind CSS to connect travelers with agencies.
- Reduced UI interaction friction and booking workflow drop-offs** by optimizing state management architecture and mobile-first component rendering.

02/2025 – Present

EDUCATION

Bachelor of Science (B.S.) in Design and Development of Video Games

Universidad Cuauhtémoc

01/2022 – 05/2026
San Luis Potosi,
Mexico
