EXPERIENCE

Project Director & Sales Manager

2024 - Present

gamespiration I SLP, SLP, Mexico

- Product Leadership: I lead the technical architecture of bespoke projects for the corporate sector, ensuring a balance between technical innovation and cost-effectiveness.
- SaaS & Backend: I designed and developed the architecture for the Moor Viajes SaaS platform, connecting travel agencies and travellers through scalable cloud-based systems.
- Engineering Management: I act as a technical bridge, translating complex business requirements into highly precise technical specifications for the development team.

XR Developer

2022 - 2024

Fyware I SLP, SLP, Mexico

- VR in Industrial Medicine: I developed Virtual Reality training simulators that had a direct impact on operational safety for clients in the medical sector.
- Tool Innovation: I laid the foundations for a proprietary 3D format conversion system using reverse engineering, optimising workflow and asset interoperability.
- High Performance: I designed large-scale interactive experiences using Unity and C#, focusing on resource optimisation for educational platforms.
- Immersive Marketing: I implemented Augmented Reality (AR) experiences for global corporate campaigns.

TECHNICAL ACHIEVEMENTS AND AWARDS

- Semi-finalist - Game Jam Plus Brazil (2025): International recognition in competitive video game development.
- Semi-finalist - BBVA Hackathon (2022): Development of an LLM model.
- 1st Place (Local) - NASA Space Apps Challenge (2022): Development of a technological solution recognised for its innovation.
